

MEMORANDUM OF UNDERSTANDING

Product Development Collaboration for CheckUpp

Date:

This Memorandum of Understanding ("MoU") sets out the understanding between:

CheckUpp Project Team

Represented by: **Dr. Alum Sheila Uyirwoth**

and

anodiam.com

Represented by: **Anirban Chakrabarty**

Together referred to as **"the Parties."**

1. Purpose of this Collaboration

The purpose of this MoU is to establish a collaborative framework for the **design, development, and delivery of a Minimum Viable Product (MVP)** for the **CheckUpp digital health platform**.

The collaboration aims to:

- Develop a **functional MVP of the CheckUpp platform**
- Validate the product with early users and healthcare stakeholders
- Establish a **robust technical architecture and product foundation**
- Enable CheckUpp to move toward **market launch and product validation**

The Parties intend to work together in a **lean, agile, and feedback-driven product development process**.

2. Teams Involved

CheckUpp Team

- Dr. Sheila Uyirwoth
- Colin
- Mary

Responsibilities include:

- Product vision and requirements
- Healthcare domain guidance
- Feature prioritisation
- Product validation and user feedback

Anodiam Team

Onsite (Australia)

- Anirban Chakrabarty

Offshore (India)

- Sayan Basak
- Atish Roy
- Alekhya Bhattacharya

Responsibilities include:

- AI and automation components
- Cloud infrastructure and deployment
- Cybersecurity practices
- Testing and release management

3. Scope of Engagement

The collaboration will focus on **testing a production-ready Minimum Viable Product (MVP)** of the **CheckUpp** platform. Indicative MVP capabilities may include:

Preventive Screening Engine

- Screening reminders based on **RACGP Red Book guidelines**

Smart Reminder System

Alerts for:

- Referral expiry
- Medication refills
- Preventive screenings
- Vaccinations

Personal Health Passport

- Dashboard of personal healthcare activities

Security Layer

- Secure authentication
- Encrypted data storage

The **final MVP feature set will be prioritised jointly** to ensure the platform remains **lean and deliverable within the MVP effort allocation**.

4. Development Methodology

Anodiam will deliver the MVP using a **Lean Agile development methodology**, characterised by:

- Iterative delivery cycles
- Feedback-driven feature prioritisation
- Test-driven development
- Continuous integration and deployment

Regular collaboration practices may include:

- Weekly progress discussions
- Product prioritisation sessions
- Sprint reviews and demonstrations

5. Free MVP Development Commitment

Anodiam agrees to contribute up to **six (6) person-months of engineering effort** toward the testing of the CheckUpp MVP.

Key conditions:

- The MVP phase will prioritise **core features necessary for product validation**
- The scope will remain **strictly limited to MVP capabilities**
- Enterprise-scale features, integrations, or advanced infrastructure are outside the MVP scope unless otherwise agreed

This phase aims to:

- Validate the technical architecture
- Enable early user testing and feedback

6. MVP Scope Limitation

Both parties acknowledge that the free MVP phase must remain **focused and deliverable**.

Accordingly:

- Development will prioritise **high-value core features** required for MVP validation
- Any additional features or scope expansions may require **separate commercial agreement**

- Feature prioritisation will be determined jointly during development cycles

7. Intellectual Property Framework

Foreground Intellectual Property

All intellectual property created specifically for the **CheckUpp product**, including:

- Product features
- User workflows
- Data models specific to CheckUpp
- Application logic unique to CheckUpp

(Collectively referred to as **Foreground IP**) Shall be owned by **CheckUpp**.

CheckUpp will have the right to operate, modify, and commercialise the platform.

Background Intellectual Property

Each party retains ownership of intellectual property that existed **prior to the collaboration**, including:

- Development frameworks
- Software libraries
- Engineering methodologies
- Generic AI components
- DevOps infrastructure
- Reusable technical tools

(Collectively referred to as **Background IP**) To the extent Background IP from Anodiam is incorporated into the platform, **Anodiam grants CheckUpp a perpetual non-exclusive license to use such components solely as part of the CheckUpp platform.**

Reusable Technical Components

Anodiam retains the right to reuse **generic technical components, architectural patterns, and engineering practices** developed during the engagement, provided that:

- No confidential CheckUpp information is reused
- No product-specific code unique to CheckUpp is redistributed

8. Product Responsibility and Regulatory Compliance

CheckUpp remains responsible for:

- Clinical accuracy of healthcare information
- Compliance with healthcare regulations
- Validation of medical guidelines or screening recommendations

Anodiam's role is limited to **technology appraisal, testing and software improvement.**

Anodiam shall not be responsible for:

- Medical advice
- Healthcare outcomes
- Clinical decision-making
- Regulatory approvals

9. Data Privacy and Security

The MVP platform will incorporate reasonable safeguards including:

- Encrypted storage

- Secure authentication
- Privacy-aware architecture

Compliance with applicable privacy and healthcare regulations may evolve as the product progresses toward commercial deployment.

10. Project Continuity and Founder Engagement

Successful MVP development requires active engagement from both parties. Accordingly:

- The CheckUpp team will provide timely feedback and product direction
- If key product inputs are not provided for **30 days**, the project may be considered inactive
- In such cases, Anodiam may **pause development activities**
- If inactivity continues for **60 days**, the MVP phase may be formally closed and future development may require a **new agreement**

11. Transition to Commercial Development

Once the MVP reaches early market usage or requires further development, the Parties may transition to a **commercial development agreement**. At that stage:

- Commercial terms and rates will be agreed transparently
- Development will continue under the same Agile methodology
- Pricing will aim to remain **cost-efficient relative to market benchmarks**

12. Non-Exclusivity

This MoU does not create exclusivity obligations unless otherwise agreed in writing.

13. Non-Binding Nature

This MoU reflects the **intent and principles of collaboration** between the Parties.

It is **not intended to constitute a legally binding contract**, except where explicitly stated.

A formal commercial agreement may be executed at a later stage if the Parties choose to continue beyond the MVP phase.

14. Term of the MoU

This MoU will remain in effect until:

- Completion of the MVP phase, or
- Replacement by a formal commercial agreement
